Reda Kassoumeh

Syria - Rif Dimashq - Dahiat Al-Firdous - Jamraya • +963 992 962 532 • redakassoumeh1@gmail.com

A Software Developer specializing in Full Stack Development with over two years of experience in building and developing innovative applications using JavaScript, Node.js, and React. Proficient in designing interactive user interfaces and developing robust back-end systems with modern technologies. Skilled in database management, particularly with MongoDB, and has a solid understanding of MySQL. Continuously seeks to expand technical expertise and achieve professional growth by joining innovative teams working on advanced technical solutions.

Experience

2025
Senior Developer – ALABUO STEEL

Led the development of a comprehensive internal management system tailored to the company's operational needs.

Built the front-end using React.js and Bootstrap, with full support for Arabic localization.

Developed dynamic and interactive admin interfaces for managing suppliers, employees, bank accounts, and classifications.

Designed and implemented RESTful APIs using Next.js and MongoDB, focusing on performance, security, and scalability.

Deployed services on VPS infrastructure using CapRover for efficient service orchestration.

Took ownership of nearly the entire development lifecycle, from system architecture and database modeling to UI design and deployment.

Contributed to the company's digital transformation, significantly improving operational efficiency and processing speed.

2022 – 2025
Lead Developer – Speed Marketing Team

Served as the lead developer on all team projects, including websites and applications such as Speed Whats and Speed Whats Plus.

Designed and developed integrated systems using JavaScript, Node.js, and React.

Managed databases with MongoDB and MySQL to ensure high performance and data integrity.

Collaborated with a diverse team to deliver projects on time, adhering to the highest quality standards.

Projects

Speed Whats – Chrome Extension

Description: A Chrome extension that allows sending messages to multiple numbers with support for media attachments and other advanced features.

Role: Lead Developer, responsible for chrome extension development & back-end development using PHP.

Technologies Used: Laravel, Chrome Extension API, RESTful API, MYSQL.

Speed Whats Plus – Service

Description: A project that enables sending messages via WhatsApp to multiple numbers with advanced features like auto-reply and integration with other applications.

Role: Lead Developer, responsible for front-end development & back-end development using Next.js for Websites & Node.js for Server Side.

Technologies Used: Next.js, Node.js, MongoDB.

ALABUO Steel – Internal Management System

Description: A full-featured internal system built for a Saudi steel trading company to manage suppliers, employees, financial accounts, and operational classifications. The system supports both Arabic and English, with modular interfaces and real-time updates.

Role: Full-Stack Developer, responsible for building both the front-end and back-end from scratch, including system architecture, API design, and deployment.

Technologies Used: React.js, Next.js, MongoDB, Bootstrap, CapRover.

Qadaey – Lawyer Website
Description: A professional website developed for a law office, offering information about legal services, lawyer profiles, and a contact interface. The website was built with a responsive design and Arabic language support.
Role: Full-Stack Developer, developed both the front-end and back-end as part of the Speed Marketing team.
Technologies Used: Laravel, Blade, Bootstrap, JavaScript, MySQL.

Speed Marketing – Official Website
Description: The official website for Speed Marketing agency, showcasing the team's services, portfolio, and contact forms. Designed to reflect the agency's brand identity with a modern and user-friendly layout.
Role: Full-Stack Developer, responsible for building both front-end and back-end features, including custom CMS sections and SEO optimization.
Technologies Used: Laravel, Blade, Bootstrap, JavaScript, MySQL.

Skills

Programming Skills

HTML • CSS • JavaScript • Node.js • Express.js • PM2 • MongoDB • Mongoose • React • Next.js • Tailwind • Flowbite • PHP • MYSQL • Laravel

• VS Code • Git • GitHub • CapRover • Chrome DevTools • Figma • Postman • Docker (basic)

Soft Skills

• Fast learner with the ability to quickly adapt to new tools and concepts

• Creativity in designing user-friendly solutions

• Adaptability to new technologies and environments

• Attention to detail and commitment to high-quality output

• Effective communication and teamwork skills

Education

2024 - PRESENT
Bachelor of Software Engineering | Al-Sham Private University

Languages

Native Language: Arabic

Other Languages: English
